**Skin Rejuvenating Peel Treatment**

**How to Use the Skin Rejuvenating Peel**

1. Cleanse face with Cellbone Collagen Cleanser or facial soap. Apply Collagen Skin Refresher/Toner or Prep Skin Refresher. ( optional )
2. Apply a few drops of Cellbone Glycolic, Salicylic or Lactic Acid Peel evenly over the face avoiding eye area. Cotton ball, cosmetic brush or clean finger may be used to apply.

\*First time use: Apply a very small test to the forearm or behind the ear. As with any product, there is a chance you may be highly sensitive to glycolic, salicylic or lactic acid. If you experience immediate burning and redness, apply neutralizer or soap and discontinue use.

3. Leave it on for 3 to 5 minutes ( 30 seconds to 1 minutes for the un-buffered peels ).
4. Wash off with cool water.
5. Apply Cellbone Hydra CP + Gel or Neutralizer Skin pH Balancer or Moist'Seal or over-the-counter Aloe Vera soothing gel.
6. Be sure to use a sunscreen or limit sun exposure while using peel products.
7. Use once or twice a week for 6 weeks and hold off up to 2 weeks for the skin cells to turn over. You may restart the cycle.
